

Press Release

Financial Technologies announces the Launch of Tickerplant Infovending Limited.

For Immediate Release

Mumbai, April 9th, 2007: Financial Technologies (FT), India's leading technology solutions provider to financial markets, announces the launch of Tickerplant Infovending Ltd (Tickerplant), a FT Group company. Tickerplant is in the business of information retailing by providing data, news and analytics for financial markets.

Tickerplant, aims to create a digital infrastructure to disseminate real-time, low latency ticker feed of over 100 market segments across the globe over a period of time. Its data management capabilities provide enhanced data aggregation, indexing, and searching facilities to meet the information needs of its clients.

Tickerplant will provide exchange feeds for Indian and International Equities, Commodities, Forex, and Precious market rates & news. Tickerplant's digital broadcasting station will ensure seamless availability of critical market data and solutions to facilitate need based customization.

Tickerplant's terminal based services for Market Data & News include a set of exclusive products which facilitate easy and accurate access to exhaustive market data and contents. It provides real-time market data across Domestic and International exchanges that cover indices and individual scripts. Commenting on the launch, Mr. Dewang Neralla, co-founder and chief technology architect said, "Tickerplant endeavor is to empower the Indian Retail Investor by providing Invaluable market Information at Affordable Value and drive prosperity to the last mile through democratization of market intelligence data. The goal is to level the playing field for the smallest Indian investors by bringing 'Wall Street to the Man on the Street' "

About Financial Technologies (India) Ltd.

Financial Technologies (BSE: FINTECH, NSE: FINANTECH), is India's leading software product enterprise focused on developing mission-critical Straight -Through-Processing (STP) solutions. Financial Technologies has developed proven transaction automation technologies for Equities, Forex, Commodities and bonds markets. Deriving strength from its exhaustive library of product IPRs, Financial Technologies has set-up robust market-place platforms offering sophisticated 'exchange operations' and 'shared services' on high-end technology infrastructure.

Further, the Company has promoted MCX (Multi Commodity Exchange), India's No. 1 multi commodity derivatives exchange; DGCX (Dubai Gold and Commodities Exchange) , the first international commodity derivatives market in the Middle East and IBS Forex, inter-bank foreign exchange platform. Other key exchange ventures include NSEL (National Spot Exchange), SNX (Safal National Exchange) and GBOT (Global Board of Trade, Mauritius).

The Group has also incubated four technology ventures – NBHC (National Bulk Handling Corporation), TickerPlant Infovending, atom technologies and Riskraft Consulting – that support overall ecosystem development of financial marketplaces.
